

Dry Goods

Dry goods are used in food industry as cooking or food processing ingredients. We offer dried ingredients such as dried mushrooms and bamboo piths from quality sources. They can be used in soups, sauces, powdered marinades, condiments, snacks, or made into canned and frozen mushrooms. We also supply palm sugar, which can be used as an ingredient in both home and industrial cooking, in savoury and sweet dishes alike, e.g. chilli dips, sauces, coconut curries, and desserts. The taste and aroma added by the sugar will make the food more appetizing.
